TC IronZinc

Top Coat:
TC IronThane Top Coat

INTRODUCTION

Dyno Tough Coatings faced a formidable challenge when entrusted with a complex task by Adani Hazira Port Ltd. Tasked with repainting tanks without any surface preparation, coupled with the added complexity of a tank wrapped in GI cladding, our team took on the project with confidence. Leveraging our diverse product line and past experience, we successfully executed the task, opting for chemical cleaning to prepare the surfaces.

The application of our top-tier painting system ensured a high-quality finish. Throughout the project, we conducted regular inspections and on-site testing, showcasing Dyno Tough Coatings' commitment to delivering effective solutions in the most demanding scenarios.
