Product:

Primer:

TC IronZinc

Topcoat:

TC PolyMio Top coat

INTRODUCTION

Securing our opportunity in maintenance painting within an intensely corrosive environment, we faced the challenge of manual surface preparation. Undeterred, our team at DYNO TOUGH COATINGS embraced the task with dedication and expertise.

Implementing our advanced coating system, we not only met the stringent requirements but also ensured a durable finish that extends the lifespan.

This successful venture underscores our adaptability and commitment to excellence in tackling complex projects, setting a solid foundation for future endeavours in challenging environments.
